

MECHANICAL AND HEAT EXCHANGERS

At UPS Industrial Services, we go beyond maintenance to deliver full-scope support across every phase of your project.

Utilizing a large fleet of extraction equipment, our capable team of specialty mechanical supervisors and craftsmen deliver consistent and high-performance outages to your facility.

Our team skillfully operates a range of torque equipment to execute torque and tension work with precision. We utilize the most cutting-edge equipment and technology to safely handle all your specialty mechanical needs, from the basic bolt up to the most technical bolting standards. We also repair and service all types and models of heat exchangers, regardless of job complexity.
