

PIPING

At UPS Industrial Services, we provide full-scope piping solutions engineered for demanding manufacturing and technology applications.

From complex process piping systems to specialty alloy welding, our skilled craftsmen deliver precision fabrication and installation with safety and code compliance at the forefront.

Supporting advanced manufacturing and technology facilities, our piping teams execute detailed layouts, high-purity systems, and specialty welding applications. We coordinate closely with mechanical and electrical teams to deliver efficient, high-quality installations built for performance and longevity.

- ★ **Process & Utility Piping**
- ★ **High-Purity & Specialty Systems**
- ★ **Pipe Fabrication & Installation**
- ★ **Specialty Alloy Welding**
- ★ **Code-Compliant Execution**
- ★ **Testing & Quality Assurance**
- ★ **Turnarounds & Capital Projects**
- ★ **Integrated Multi-Craft Coordination**
- ★ **Reliable System Performance**
- ★ **Piping Material Expertise**
 - Carbon Steel, .5% Chrome through P91, Chromes, Stainless Steels Ferritic and Austenitic, Nickel, Low alloy Steel, Duplex Stainless steels, High chrome stainless, Aluminum, Copper, Brass, Cu-Si, Cu-Ni, Titanium, Zirconium, PVDF, HDPE, HDPP, PFA, PVC
