

TECHNICAL BOLTING

At UPS Industrial Services, we go beyond maintenance to deliver full-scope support across every phase of your project.

Whether your company is undergoing a turnaround or requiring routine maintenance, our teams perform technical bolting work to the highest level of precision.

Certified ASME PCC1 trained professionals employ comprehensive bolting services covering a large inventory of torque/bolting equipment to enable thorough analysis, training, development of procedures and complete engineering support. We have experience across all types of heavy equipment and always work in accordance with all industry and company-required safety requirements to maximize both safety and efficiency.

- ★ **Bolting Design**

- Clamping Force And Gasket Crush Recommendations
- Stress Modeling (FEA)
